Clean River for our Future

To ☐ HarborComments

I am writing to request full cleanup of the Willamette superfund site.

The right to clean water is such a very basic right. We all need it. That need is not going to go away. But bit by bit, clean water is going away and it is going away because small and large decisions are made on a daily basis because of misplaced priority. We cannot thrive as a city, we cannot thrive as humans, we cannot thrive as members of an ecosystem without such a basic need as clean water protection as a priority in place.

Generations of humans and generations of other species depend upon it.

Please, do the right thing. Do it now. Even financially, It makes sense. The cost of cleaning later, with all of the multiplying the effects, will be much more.

Do the right thing.

Sincerely,
